# Pilot timing sheet: standard clean

**Paid pilot.** The goal is to finish every task to the checklist standard. Do not rush to meet an estimate: cleaners are paid for actual time, and estimates are recorded only to see how far off they were. Pilot home 1 is the owner's home.

| | | | | |
|---|---|---|---|---|
| **Pilot home** 1 / 2 / 3 | **Date** | **Home ID** (no address) | **Pets present?** Y / N | **Photo permission?** Y / N |
| **Clock start** | **Clock finish** | **Elapsed minutes** (finish - start) | **Number of cleaners** | **Cleaners** (initials) |

**Cleaner-minutes** = minutes each cleaner spent, added together. Two cleaners working 30 minutes in a room = 30 elapsed minutes but **60 cleaner-minutes**. Every time column below is in cleaner-minutes, except elapsed time above.

## 1. Rooms and areas (selected rooms only)

**Task IDs.** Kitchen K1–K10 | Full bath B1–B9 | Half bath B1, B3, B4, B5, B7–B9 | Bedroom R1–R6 | Living/dining/family and Office L1–L5 | Other room L1–L5 (record use and size) | Hallway/entry/stairs W9 | **Every selected room** W1–W8, plus W10 at the end. **Floor minutes are part of the room's total, not added to it.** Condition: O = ordinary, H = heavy (H must be disclosed and quoted to count as agreed work).

| Room / area (type; use if Other) | Approx size (sq ft) | Floor type (carpet / hard / mixed) | Starting condition O / H + note | Est. cleaner-min (room total) | Actual cleaner-min (room total) | of which floor min | Quality check (OK or issue) | Not completed / missed (task ID + reason) |
|---|---|---|---|---|---|---|---|---|
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| **Rooms total** | | | | | | | | |

Use one row per room. If a room needs more time to reach the standard, keep going and record the actual minutes.

## 2. Ordinary vs heavy: K3 stovetop, K5 microwave, B2 tub/shower

These minutes are already included in the room totals in section 1. They're broken out here so the condition examples can be built. Photograph only with permission.

| Task | Room | Condition O / H | Disclosed & quoted? Y / N | Cleaner-min for this task | Photo # (if permitted) | What made it heavy / notes |
|---|---|---|---|---|---|---|
| K3 stovetop | | | | | | |
| K5 microwave | | | | | | |
| B2 tub/shower | | | | | | |
| B2 tub/shower | | | | | | |
| B2 tub/shower | | | | | | |

## 3. Add-ons selected for this visit, and non-room time

| Item | Qty / unit | Selected? Y / N | Est. cleaner-min | Actual cleaner-min | Notes / quality |
|---|---|---|---|---|---|
| Change sheets | ____ beds | | | | |
| Inside oven | ____ ovens | | | | |
| Inside fridge | ____ fridges | | | | |
| Inside cabinets (emptied by customer) | ____ cabinets | | | | |
| Interior windows & tracks | ____ windows | | | | |
| Wet-wipe blinds | ____ sets | | | | |
| **Add-ons total** | | | | | |
| Setup (arrive, unload, walk-through) | | — | | | |
| Packing (pack up, load) | | — | | | |
| Travel to home (per cleaner) | | — | | | |
| Travel from home (per cleaner) | | — | | | |

## 4. Visit totals

| | Estimated | Actual |
|---|---|---|
| **A.** Standard-clean cleaner-minutes on site: rooms (sec. 1) + add-ons (sec. 3) + setup + packing | | |
| **B.** Scope-review cleaner-minutes (sec. 5): kept out of A, but paid work | - | |
| **C.** Pilot walkthrough and feedback cleaner-minutes (explaining the checklist, estimating, debrief) | - | |
| **D.** Travel cleaner-minutes (to + from, sec. 3) | | |
| **Total paid pilot labour = A + B + C + D (cleaner-minutes)** | - | |
| Elapsed (clock) minutes on site, from page 1 | | |

Room and add-on costs are built from A. B, C and D are still paid and count in total pilot labour.

## 5. Scope-review tasks: undecided, observe and time separately

These four tasks are **not decided**: they're not part of the standard clean, not add-ons, and not excluded. Record what you see. Do a task only if the homeowner agrees for this pilot, and time it separately. **Don't include these minutes in room totals.** They are still paid work and count in total pilot labour (sec. 4, line B).

| Task (still undecided) | Need observed: none / some / heavy | Where (rooms) | Done in pilot? Y / N | Incremental cleaner-min | Observations |
|---|---|---|---|---|---|
| K7: full wash of every cabinet front | | | | | |
| B6: scrubbing grout lines | | | | | |
| W5: baseboard stain / scuff removal | | | | | |
| W6: full wipe of doors and frames | | | | | |

## 6. Completion and quality check

| | |
|---|---|
| **Final walkthrough (W10) done by:** | **Checked against the checklist by:** |
| **Visit outcome:** Complete / Incomplete service (agreed work left unfinished, including running out of time) | **Anything missed after the quality check?** (task ID, room, fixed on site Y / N) |

A not-completed reason is a record, not a decision: the office reviews every not-completed item against the agreed scope (rule 9).

## 7. Unclear instructions and cleaner feedback

| Task ID | What was unclear or didn't work | Suggested wording or change |
|---|---|---|
| | | |
| | | |
| | | |
| | | |

**Cleaner feedback** (pace, equipment, supplies, anything that would make the standard easier to hit):

## 8. Reach equipment agreed with the cleaners (internal, not for customer wording)

| | | | |
|---|---|---|---|
| [ ] Extension duster length ____ | [ ] Extension pole length ____ | [ ] Step stool ____ steps / height ____ | [ ] Other: _____ |

**Safe-use rules agreed:**

Never stand or climb on furniture, counters, tubs or fixtures (rule 1). Anything not safely reachable is recorded as not completed: beyond safe reach.
